# JIRA Priority/Work Estimate/Role Matrix

This is to assist in our product operations teams prioritizing, building work estimates and understanding our role to the development effort.

| Priority | Working Hours | Working Days | Complexity | Description | Team Role |
|---|---|---|---|---|---|
| **Highest** | **> 80h** | **> 10d** | **High** | **High level scripting/stylesheet/coding or major UI/UX application updates.** | **Manage development entirely; consult as support.** |
| **High** | **> 48h - 80h** | **> 6d - 10d** | **Med/High** | **Medium level script/stylesheet/coding or 3rd party integrations with a deployment required.** | **Manage development as needed; code only if required.** |
| Medium | > 24h - 48h | > 3d - 6d | Low/Med | Standard level script/stylesheet/coding or 3rd party changes with a deployment required. | Code as needed; manage development if applicable. |
| Low | > 8h - 24h | > 1d - 3d | Minimal/Low | Basic level script/stylesheet/coding changes or 3rd party updates with possible deployment required. | Consult as needed; code if applicable. |
| Lowest | < 8h | < 1d | None/Minimal | Minimal level script/stylesheet/coding changes with no deployment required. Usually for content editing. | Consult to provide guidance for changes or updates. |
